-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 14 February 2000.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 18-37 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 18-37 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All   b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☒ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Preliminary Amendments***

The preliminary amendments filed on January 14, 2002 and February 14, 2002 has been entered.

### ***Specification***

Claim 22 is objected to because of the following informalities: Line 3 states "one or ore", which should likely state --one or more--. Appropriate correction is required.

The description portion of this application contains a computer program listing consisting of more than three hundred (300) lines. In accordance with 37 CFR 1.96(c), a computer program listing printout of more than three hundred lines must be submitted as a computer program listing appendix on compact disc conforming to the standards set forth in 37 CFR 1.96(c)(2) and must be appropriately referenced in the specification (see 37 CFR 1.77(b)(4)). Accordingly, applicant is required to cancel the computer program listing appearing in the specification on pages 16-65, file a computer program listing appendix on compact disc in compliance with 37 CFR 1.96(c) and insert an appropriate reference to the newly added computer program listing appendix on compact disc at the beginning of the specification.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis et al. U.S. Patent No. 5,088,036 ('Ellis').

Ellis discloses:

As to claim 26,

temporarily restricting execution of said inutators during a garbage collection cycle, while processing the corresponding thread state for each one of said mutators; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68;

permitting each one of said mutators to resume unrestricted execution, as soon as said mutator's own corresponding thread state has been processed; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68;

identifying each one of said objects that is currently accessible to at least one of said mutators; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68; and

executing said mutators subject to a write barrier which is invoked when said imitators modify pointers within said plurality of data objects but not when said mutators modify pointers within said thread states; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68.

As to claim 27,

wherein said step of temporarily restricting the execution of said mutators includes a first step of restricting said mutators from creating any new data objects, and a second step of temporarily suspending execution of said mutators; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68.

As to claim 28,

tracing one or more pointers stored in said objects, for each one of said objects that is in turn pointed to by at least one pointer stored in at least one of said imitator thread states; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67; 14:60-67; 15:66-68.

As to claim 29,

a garbage collector for processing the corresponding thread states of said mutators at the beginning of a garbage collection cycle, and for identifying each one of said data objects that is accessible to at least one of said mutators during said cycle;

See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67;

one or more processors for executing said garbage collector and said mutators;

See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67;

and

a scheduler coupled to said processors for scheduling execution of said garbage collector and said mutators on said processors, said scheduler being operative to temporarily restrict execution of said mutators while the corresponding thread state is being processed for each one of said mutators, and to permit each one of said mutators to resume unrestricted execution as soon as said mutator's own corresponding thread state has been processed; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67.

As to claim 30,

wherein said garbage collector further includes a processor for flipping said one or more objects from a first label representative of accessible status to a second label representative of undetermined status; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67.

As to claim 31,

wherein said garbage collector further includes a storage for saving a list of said mutator threads; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67.

As to claim 32,

wherein said garbage collector includes a processor for tracing one or more pointers stored in each of said mutator thread states; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67.

As to claim 33,

wherein said garbage collector includes a processor for tracing one or more pointers stored in said data objects, for each one of said objects that is in turn pointed to by at least one pointer stored in at least one of said mutator thread states; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30; 11:1-67.

As to claim 34,

wherein said garbage collector does not copy said data objects; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30 and 60-68; 11:1-67.

As to claim 35,

wherein said one or more processors are implemented with stock hardware; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30 and 60-68; 11:1-67.

As to claim 36,

wherein said scheduler is operative to temporarily restrict said imitators from creating any new data objects, and is further operative to suspend execution of said imitators; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30 and 60-68; 11:1-67.

As to claim 37,

a processor for executing said mutators subject to a write barrier which is invoked when said mutators modify pointers within said plurality of data objects but not when said mutators modify pointers within said thread states; See Abstract; 1:40-55; 6:30-67; 7:1-66; 8:35-65; 9:4-21 and 50-67; 10:8-30 and 60-68; 11:1-67.

As to claims 18-25, they are combinations and subcombinations of previously rejected claims and are rejected for their respective reasons as stated above.

Claims 18-37 are rejected under 35 U.S.C. § 101 as claiming the same invention as that of claims 1-17 of prior U.S. Patent No. 6,341,293. This is a double patenting rejection.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Vogel*, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. ' 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. ' 1.78(d).

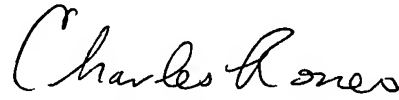

Claims 18-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,341,293. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are arguably broader than claims 1-17 of Hennessey '293 which encompasses the same metes, bounds, and limitations. Therefore, it would be obvious to eliminate the limitations of the narrower claims, since it has been held that omission of an element and its function and a combination where the remaining elements perform the same functions as before involves only routine skill in the art. See *In re Karlson*, 136 USPQ 184.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Rones whose telephone number is 703-306-3030. The examiner can normally be reached on Monday-Thursday 8am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici can be reached on 703-305-3830. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3800.
